Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Mauricio Sierra  
720 N. Dubuque St  
Apt. #4

Commissioner Jonathan Adelstein

Dear Commissioner Adelstein,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,  
Jeff Perzynski

condor1219@sbcglobal.net wrote on 8/30/2007 11:34:38 PM :

Dear Commissioner Martin,

I am one of more than 230 million Americans who use wireless services every day to stay in touch with friends and family, to be more productive at work, to call for help in emergencies, and to be accessible when I want to be. Wireless users like me can enjoy those benefits and more, because wireless service is so affordable and so accessible.

Unfortunately, inconsistent laws and regulations are proliferating in states and cities across the country. This threatens to drive up wireless prices, limit the number of provider choices for consumers, and slow the introduction of new products and services into the market. Especially for families, small businesses, seniors and others on fixed incomes, the cost and confusion of increased state laws and regulations could ultimately put wireless services out of reach.

You can ensure that wireless consumers like me will benefit from one fair, consistent national policy for wireless services, with your support for meaningful telecommunications reform legislation in the 110th Congress. By supporting the Cell Phone Tax Freedom Act of 2007, you can relieve American wireless consumers of an unfair tax burden by placing a 3-year freeze on new, discriminatory state and local wireless taxes.

Wireless service is something I use every day, and I like choosing the plans and features that are the best fit for me and for my family. So in 2007, I ask you to please stand up for more than 230 million Americans, and make it your priority to support communications reform in the 110th Congress. Enact one fair, consistent national wireless policy, and support the Cell Phone Tax Freedom Act of 2007, and place a 3-year tax freeze on new, discriminatory state and local wireless taxes.

As a policymaker in Washington, you can relieve wireless consumers across the country of the cost and confusion of conflicting state laws and regulations. Thank you for your leadership on this issue. I appreciate your support for this critical issue in the 110th Congress.

Sincerely,

Randy Califf

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks ([www.m2znetworks.com](http://www.m2znetworks.com)) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Jessica Bassan

FCC Chairman Kevin Martin

Dear FCC Chairman Martin,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,  
STEVEN GOSNELL
